

Medical Aesthetician Workshop

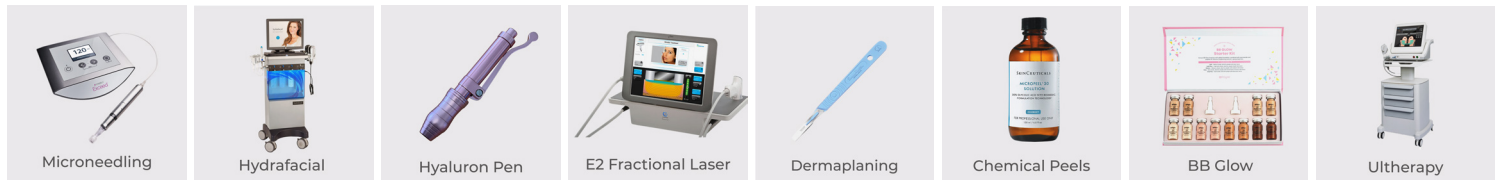

COURSE OUTLINE

Course Overview

Florida Academy's workshop is designed to advance your career as a practicing medical professional. The curriculum takes an in-depth look at medical office protocols and how to interface effectively as a peer and highly-valued member of an office's medical team. Learn how to assume a vital role in a medical setting, how to add value to office protocols, and how to perform according to scientific methodologies as well as OSHA and HIPPA regulations. The five Monday-only classes will provide theoretical and clinical training in a variety of today's most in-demand facial rejuvenation and skin repair treatments. These include microneedling, dermaplaning, microdermabrasion, ultherapy, and advanced chemical peels.

Training Focus

Become adept at administering a full range of advanced facial rejuvenation and skin resurfacing procedures to treat skin laxity, wrinkles, hyperpigmentation, acne scarring, and sun damage.

Live On-Campus or Online Self-Paced

ON-CAMPUS: Live instructor-led clinical protocols and Q&A sessions. Includes study guide, step-by-step treatment videos, homework, quizzes, handouts, and live vendor presentations.

ONLINE: Learn at your own pace. No live instructor. Start anytime. Includes study guide, step-by-step treatment videos, homework, quizzes, handouts, and vendor videos.
